IDAnton

📍 Novosibirsk, Akademgorodok

EDUCATION

LAVRENTIEV LYCEUM №130

2015 – 2019
Advanced physics and mathematics class

NOVOSIBIRSK STATE UNIVERSITY

2020 – 2024
Faculty of Physics, bachelor, 3 years

Completed IT courses:
- C programming (excellent)
- Practical programming C++, Python (excellent)
- Computer simulation of physical phenomena (excellent)
- Technical means of automation of scientific research, C (excellent)

Scientific course work: "Development of methods for analyzing the porous structure of adsorbents and catalysts using neural networks"

SKILLS

Programming languages: Python, C, C++
Technologies: Git, Linux, Docker, SQL
Frameworks: NumPy, Django, PyQt, Selenium, matplotlib, python-telegram-bot
English: Upper-intermediate

PROJECTS

- Drude model simulation desktop application (PyQt, NumPy)
- NSU timetable telegram bot, 300+ users (Telegram-api, PostgreSQL, Docker)
- Neural network for isotherm classification (NumPy, matplotlib)
